

Vision Shift! Art in the Age of Climate Change

“Vision Shift! Art in the Age of Climate Change” explores the future of Santa Fe as we look at the opportunities ahead in the new energy economy. We invite you to join us by using your creative power to help re-imagine our future landscape – one powered by the sun, the wind, and the land, not fossil fuels.

It is our hope that Vision Shift! will effect public policy, transform our carbon footprint and create meaningful social change. The art can be hopeful images of what will be, in the real or abstract, or can also include graphic images of earth devastation, human displacement, the effects of hubris as well as depictions of suffering and tragedy.

Call for Entries
group show
emerging & established artists
All media welcome.

October 2009

A variety of venues in Santa Fe, New Mexico.
